## Airworthiness Circular

To  
Avia Club  
Pokhara Ultralight  
Fishtail UltraFlights

Attention of this division has been drawn of the fact that contaminated petroleum products are rampant nowadays. In light of flight safety, all Ultralight Aircraft Operators are informed to test the quality of the fuel to be used before using it for flying purpose. The operators are also notified to sample check the fuel in each tank containing the untested fuel. Only fuel with appropriate quality can be used for flying purpose.

Thanking You,

Er. Bharat Raj Parajuli  
Dy. manager  
Airworthiness Inspection Division
